

# CEMETECH

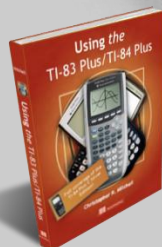

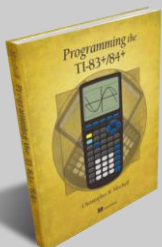

("KEH-meh-tek")

Cemetech is a community of volunteers teaching programming, electronics, math, and science. Come get help with these, or show off your software and hardware projects. Cemetech focuses on TI, HP, and Casio graphing calculator programming, but we also speak C/C++, Java, Python, Javascript/HTML/CSS, PHP, and more.

- ❖ **Get help with graphing calculators!** We can teach you graphing, statistics, programming, and more on the TI-84 Plus, TI-Nspire, Casio Prizm, HP Prime, and others.
- ❖ **Learn programming!** We're friendly and patient and can help you with tons of computer and calculator programming languages.
- ❖ **Ask us questions!** We can answer your questions about computers, calculators, electronics, math, science, and more.
- ❖ **Need tools for your classroom?** We have an online TI calculator emulator, forums where students and teachers can ask questions, free STEM activities, an online program editor, and more.
- ❖ **Want programs and games?** Download thousands of cool, free calculator programs, activities, and games made by Cemetechians, or come share your own.
